

## **Swift MAN TGL rescue fleet for Croatian automobile association**

Munich, July 24, 2014

### **Eleven new TGLs, eco-friendly Euro 6 engines, 220 horsepower**

Croatian automobile association HAK has put new rescue vehicles into service just in time for the big vacation season: eleven new MAN TGLs with loading platforms are ready to provide swift roadside assistance.

The 8- and 12-ton models offer a large payload and with the help of a sliding platform and winch or a Palfinger HK75 crane, they are able to load cars that have broken down quickly and easily and bring them to the nearest workshop.
