

DNV Certifies MAN Diesel Two-Stroke ME-engine course

23 September, 2008. The MAN Diesel two-stroke, ME-engine training course has now been certified in accordance with Den Norske Veritas Standard for Certification of Learning Programmes (No. 3.201).

The certification is a part of MAN Diesel PrimeServ's continuous strategy to ensure uniformity and high quality in its training courses.

Tom Ballegaard, Head of Qualification Standards, After-sales, MAN Diesel PrimeServ Academies, said: "The DNV certification is an important step for us in our efforts to increase the quality of all our training courses, as well as to ensure that all our courses maintain the same high standard, regardless of training location.

He continued: "We nominated the ME-engine training course as the first for certification due to the PrimeServ Academies' focus on the importance of training engine crews in new technology. Our long-term goal is to implement an ISO 9001 quality management system here in the PrimeServ Academies."

About MAN Diesel

MAN Diesel is the world's leading provider of large-bore diesel engines for marine and power plant applications. The company designs two-stroke and four-stroke engines, generating sets, turbochargers, CP propellers and complete propulsion packages that are manufactured both by MAN Diesel and its licensees. The engines have power outputs ranging from 450 to 97,300 kW. MAN Diesel employs over 7,700 staff, primarily in Germany, Denmark, France, the Czech Republic, India and China. The global after-sales organisation, MAN Diesel PrimeServ, comprises a network of the company's own service centres, supported by authorised partners. MAN Diesel is a company of MAN AG, which is listed on the DAX share index of the 30 leading companies in Germany.
