MAN Diesel & Turbo enlarges Executive Board

The Supervisory Board of MAN Diesel & Turbo SE has appointed Arnd Löttgen to the Executive Board with effect from 1 September 2012. When he takes up his position on the Executive Board of the large diesel engine and turbomachinery specialist, Arnd Löttgen will be responsible for the newly formed Strategic Business Unit Engines, in which the production of four-stroke engines and the turbocharger business are being brought together. In his capacity as Chief Manufacturing Officer he will also have a cross-departmental role that covers all the strategic business units and includes responsibility for company-wide production strategy.

“The enlargement of our Executive Board and reorganisation of roles will provide an important foundation for the future success of our company and further growth,” says René Umlauf, CEO of MAN Diesel & Turbo SE. “We are delighted that the position is being filled by Arnd Löttgen, a colleague with great expertise who is already very familiar with the MAN Group.”

Arnd Löttgen has been with MAN since 1980, performing various roles in Germany and abroad. Most recently he was entrusted with the management of key projects at MAN Truck & Bus AG, so he has extensive experience in the field of production. Arnd Löttgen’s roles prior to that included heading up the Engine business unit and MAN Truck & Bus AG’s Nuremberg plant. He has already worked for MAN Diesel & Turbo in Augsburg as head of Business Unit High Speed in 2009/2010. Arnd Löttgen studied mechanical engineering at the University of Siegen.

About MAN Diesel & Turbo

MAN Diesel & Turbo SE, based in Augsburg, Germany, is the world’s leading provider of large-bore diesel engines and turbomachinery for marine and stationary applications. It designs two-stroke and four-stroke engines that are manufactured both by the company and by its licensees. The engines have power outputs ranging from 450 kW to 87 MW. MAN Diesel & Turbo also designs and manufactures gas turbines of up to 50 MW, steam turbines of up to 150 MW and compressors with volume flows of up to 1.5 million m³/h and pressures of up to 1,000 bar. The product range is rounded off by turbochargers, CP propellers, gas engines and chemical reactors. MAN Diesel & Turbo’s range of goods includes complete marine propulsion systems, turbomachinery units for the oil & gas as well as the process industries and turnkey power plants. Customers receive worldwide after-sales services marketed under the MAN PrimeServ brand. The company employs around 14,000 staff at more than 100 international sites, primarily in Germany, Denmark, France, Switzerland, the Czech Republic, India and China. MAN Diesel & Turbo is a company of the Power Engineering business area of MAN SE, which is listed on the DAX share index of the 30 leading companies in Germany.
