

MAN due to publish a completely revised edition of the textbook "Principles of Commercial Vehicle Technology"

Munich, May 19, 2014

The fourth edition of the reference book contains 578 pages and will be published at the end of May 2016, with expanded content and integrated digital features.

MAN Truck & Bus
Dachauer Straße 667
D-80995 Munich

MAN engineers have been shaping the development of commercial vehicles for over 100 years. This knowledge and experience forms the basis for the handbook "Principles of Commercial Vehicle Technology", which has become established as an important reference work for commercial vehicle technology over the past few years. Using a range of illustrations, graphics and tables, "Principles of Commercial Vehicle Technology" conveys the basics of truck and bus technology for the practical work of trainers, engineers, drivers, experts, motor traffic technicians and fleet managers.

Subsequent to the success of the third edition in 2007, technological advancement has now made a new edition necessary. The fourth revised edition has been expanded to include current technical highlights, such as the MAN D3876 engine and the Turbo EVBec engine brake as well as assistance systems, such as GPS-supported cruise control or Emergency Brake Assist. The chapter on bus/coach technology has been significantly expanded. "Future Technologies" is a completely new chapter highlighting various spheres of activity for the design of future mobility.

Complementary digital content

In the age of laptops and smartphones, digitalisation plays a large role in the publication of a printed reference book. This is why MAN has now expanded the print edition with complementary digital content for the first time. The reader can access films and animations via corresponding QR codes that explain selected technical matters and complex commercial

MAN Truck & Bus is one of Europe's leading manufacturers of commercial vehicles and supplier of transport solutions, with revenues of approximately €9 billion a year (2015). The product portfolio includes trucks, buses and diesel engines, as well as services related to passenger and cargo transport. A subsidiary of Volkswagen Truck & Bus GmbH, MAN Truck & Bus employs more than 35,500 people worldwide.
